

LPFM should not be given priority over FM translator service because it could interfere with my Air 1 signal. Air 1 is vitally important to the community because it provides our children with family friendly broadcasting. It is encouraging to have my radio set on a station and not have to worry about turning it on and have my children listening to inappropriate material that can be found on other stations. Without Air 1 in our community, we will not have this positive broadcasting and encouragement from other Christians. Service by Air 1 is of public interest because it sends a positive message to the community, not just other Christians.
